

Stavanger Offshore Engineering Data Event

30. October 2013
Linda Gryte Bjelland

Yesterday

Information management – not what it used to be

Virtual Library

Computers

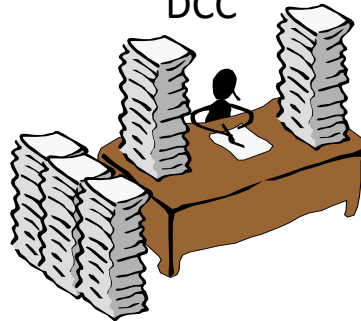

Electronic archiving

Workflows

DCC

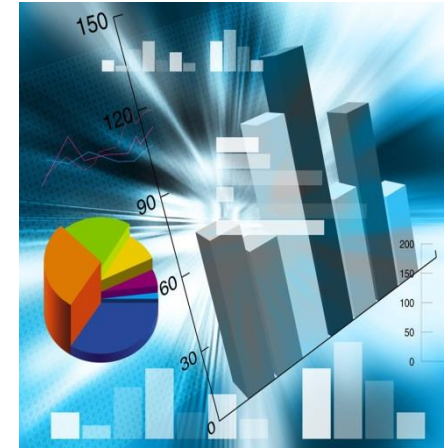

Microstation

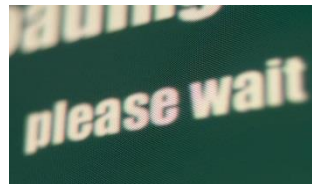

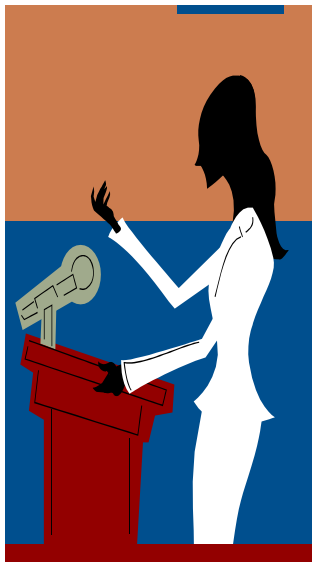

Tools of yesterday, imagine, I was around to use them!

Today

We are surrounded by devices for information management

Providing tremendous possibilities for full control

Do we manage them well enough?

Tomorrow

No one can predict the future, but one thing is for sure. Information Management is here to stay and will continue to evolve.

Will tomorrow's innovating development blow us off our chairs?

Thank You!
